Small natural wind slab near Cooke City

COOKE CITY
Cooke City
2/10/2023
Code
N-R1-D2
Elevation
10000
Aspect
SW
Latitude
45.02020
Longitude
-109.93800
Notes

2/10/23: Our group did a big loop - Daisy- wolverine- goose - sheep -lulu. Saw minimal wind transport except on high points (see photo). After looking all day saw an R1D2 slide (see 2nd photo) on a ENE slope above 10,000' south of Lulu pass, unknown trigger, though the whole area around the slide had cornice growth. We observed a lot of tracks highmarking into windloaded alpine slopes but saw no rider triggered avalanches.
