From obs: "Noticed this large avalanche in unsupported terrain yesterday morning. I called it HS-N-R3-D3-U although it looks to have failed on facets at the ground. Frequent flyer but impressive. Debris was approx. the size of a football field and 8-10' deep, ran full extent of D3 track." A Newman

Advisory Region
Bridger Range
Longitude
-111.32W

Latitude
44.73N
