Skier Triggered Avalanche in Middle Basin

Middle Basin Northern Madison 1/5/2019 Code SS-ASu-R3-D2-O Elevation 9400 Aspect E Latitude 45.33320 Longitude -111.38300 Notes

We found this fresh skier triggered avalanche in Middle Basin today 1/5/19. East <u>aspect</u>. 9,400' elev. It broke 1-2' deep on weak, sugary facets. We had stable results in our <u>stability</u> tests (so did another group nearby), but this <u>slide</u> and recent reports of collapsing in the area indicate an untrustworthy and unstable, poor snowpack structure.

This avalanche was triggered by the second skier down the slope. Nobody was caught.
