

## Three snowmobilers caught in very large slide on Buck Ridge

Buck Ridge  
Northern Madison  
1/4/2020  
Code  
HS-AMu-R4-D3-G  
Elevation  
9300  
Aspect  
NE  
Latitude  
45.17190  
Longitude  
-111.38000  
Notes

**From one of the riders caught in the [slide](#),** "The 3 persons involved were traveling across the slope about 20-30 yards up from the tree line parallel to the ridge line in the [slide](#) area when it broke, not [high marking](#) and not traveling uphill. One rider did increase his elevation while traveling across the slope but was never more than 1/4 of the way up when the [slide](#) was triggered."

---

@carter.olson, "I witnessed three snowmobilers [trigger](#) and get caught in an avalanche at second Yellowmule (Buck Ridge) at 12:40PM today. The lead snowmobiler triggered the avalanche while descending from his high mark with the other two snowmobilers below him. The lead snowmobiler was able to run out the avalanche to a degree and made it to the edge of the runout at the bottom. The other two snowmobilers were pointed uphill when the avalanche was triggered and shot into the trees when attempting to outrun the avalanche. The female was buried to her torso and the male was buried to his waist. Both sleds were buried about three feet under the debris. The Avalanche propagated about 1500ft wide. Luckily everyone involved was not harmed, just a broken arm on one of the buried sleds.

Luckily I was able to jump into action, yelling "Avalanche, Avalanche, Avalanche" grabbing everyone in my group's attention. Then I told everyone to get their beacons out and put them to search and get to where we last saw the snowmobilers. On our way to the last point of sight of the snowmobilers, they all screamed out they were ok."

Number of slides  
1  
Number caught  
2  
Number buried  
2  
Number killed  
0  
Avalanche Type  
Hard slab avalanche  
Trigger  
Snowmobile  
Trigger Modifier

u-An unintentional release
