

Skier triggered large cornice, Beehive

Beehive Basin
Northern Madison
12/20/2020
Code
C-ASu-R2-D2-O
Elevation
8960
Aspect
E
Latitude
45.32750
Longitude
-111.39700
Notes

From obs.: "Kicked off a larger than expected [cornice](#) as we skinned up the ridge on the W side of Beehive basin. Wind was blowing 20-ish across the opening, [cornice](#) had grown pretty good-sized for so little snow. I was making a turn on skins to get back away from the edge when the [cornice](#) gave way, probably pulled 25 feet end to end and broke a good 5 feet back from the lee edge of the [cornice](#). I was able to get off the [cornice](#) and avoid going over the edge. No activity on the slope below after [cornice](#) drop,... although there was a decent hard [slab](#) that pulled out just below the ridge when the [cornice](#) dropped onto it.... Hard [slab](#) on the edges was about 10" deep, some big chunks of [cornice](#) on the slope for any future riders..."

Number of slides
1
Number caught
0
Number buried
0
Avalanche Type
Cornice fall
Trigger
Skier
Trigger Modifier
u-An unintentional release
