

Divide Peak

Date

Sat, 01/29/2022 - 12:45

Activity

Skiing

We dug a snowpit about 50 ft below the summit of divide peak on a S facing slope. Snow depth at the pit was 136cm. We had an ECTP 27 on some weak snow 58cm deep. It wasn't a very energetic fracture, but it still went across the whole column.

Region

Northern Gallatin

Location (from list)

Divide Peak

Observer Name

Matt Loftis
