

Woody Ridge

Date

Sun, 01/15/2023 - 18:10

On Saturday we toured up Woody Ridge. We observed the buried surface at this location, a W aspect just off of the well traveled skin track on the west side of the ridge, but saw no propagation in an ECT. Cracking was observed in isolated pockets on NW aspects where wind loading was very evident.

Region

Cooke City

Location (from list)

Woody Ridge

Observer Name

Erich Schreier
