Skier triggered Deep Slab in Lone Lake Cirque

Lone Lake Cirque Northern Madison 3/30/2023 Code HS-ARu-R4-D2.5 Latitude 45.27710 Longitude -111.46400 Notes

There was a large, <u>deep slab avalanche</u> snowboard triggered in Lone Lake Cirque this afternoon (3/30). The <u>slide</u> ripped in a secondary start zone below ridgetop, and ran far into the flats, and may have run a bit uphill, where it encountered the rock glacier moraine in the runout. It looks to be a R4, D2.5. Snowboarder walked away unharmed.
