As expected in S Brackett

Date Mon, 12/11/2023 - 14:35 Activity Skiing

NE aspect 7600 ft.

Hand pit - 40 cm deep

First 15cm of the snowpack from the ground up, was rotten, un-compacted snow, with a thin hard crust.

Top 25 cm was compacted snow, density 4F.

S Brackett Cr road has a few inches over most of it. Snowpack is still too shallow to allow for much skiing.

Region Bridger Range Location (from list) Brackett Creek Observer Name C. Robinson
