

Natural Avalanche on Mount Bole

Mt. Bole

Northern Gallatin

12/9/2023

Code

N-R2-D2

Aspect

NE

Latitude

45.41600

Longitude

-110.99800

Notes

Natural avalanche on Mt. Bole. Observed taken 12/14/23. Avalanche likely released the previous weekend, around 12/9/23.

From obs: "We were ice climbing on Mummy 3 and 4 yesterday and as we looked across the valley to Mount Bole, we could see evidence of avalanche activity on the NE [aspect](#) of the peak. It looked quite big in length but could tell a depth from that far away."
