## **Eastern Beartooths**

Date Sun, 02/18/2024 - 13:20 Activity Skiing Snowboarding

Toured west of Cole Creek outside RLM boundary. Experienced multiple collapses and cracking. Unsupportable surface with facets at the base of snowpack. Stability tests resulted in multiple ECT with propagation. Dug pits in location with previous wind loading HS=141, not as deep on adjacent aspects.

No natural avalanches observed. See attached snowpilot profile.
