Wind Slab Avalanches Below Pine Martin Ridge

Cooke City 3/26/2024 Code SS-NC-I Aspect NE Latitude 45.00740 Longitude -109.89100 Notes

From obs: "Today (03/26/2024) there were strong winds <u>loading</u> snow onto the Northeast face off of Pine Martin Ridge, just North of Ram Pasture. When we got a better view of the slope, we noticed there had been a natural wind-<u>slab</u> avalanche (left), possibly triggered by a <u>cornice</u> fall. While transitioning, we saw a small part of the same <u>cornice</u> break off and <u>trigger</u> a similar <u>wind slab</u> avalanche (right). "
