

# Wind-Slab Avalanches in Bridger Range

The Ramp  
Bridger Range  
3/27/2024  
Code  
SS-NC-R2-D2-I  
Aspect  
E  
Latitude  
45.82880  
Longitude  
-110.93100  
Notes

On our drive home we saw, what I assume were, natural wind-[slab](#) avalanches on Quarter Saddle (looked like a [cornice collapse](#)) and in Argentina Bowl. Bridger Peak was obscured by heavy wind-[loading](#). There was a small wind-[slab](#) release out of Gibbs (I think), I suspect skier triggered, but I could make out a [track](#).

Number of slides  
4  
Number caught  
0  
Number buried  
0  
Avalanche Type  
Soft slab avalanche  
Trigger  
Cornice fall
