

buried surface hoar, Midway Republic Cr.

Date

Sat, 12/14/2024 - 13:15

Activity

Skiing

Toured up to Midway meadows, observed no cracking or collapsing. We found no propagation in our ECT at 8600' on a E aspect with HS 70cm. Found preserved buried surface hoar approximately 15-20cms below the snow surface. Low tide in tree exit, but fun skiing!

Region

Cooke City

Location (from list)

Republic Creek

Observer Name

BMG L1
